Unlock enterprise
document intelligence

A powerful,
intelligent document
processing platform
that democratizes
document digitization
and amplifies
human potential
for smarter business
decisions.

BROCHURE

 **xtractedge** | Platform

As organizations pivot from simply surviving in a digital era to thriving in a digital world, the business opportunities for enterprises that can extract value from their data have never been greater. Unlocking this data, hidden in complex enterprise documents can generate insights powering new and real business outcomes.

XtractEdge, our Intelligent Document Processing (IDP) platform is a game changer opening doors to a wealth of rich insights. The AI powered platform enables faster, easier and data-driven decision making without the need for time-intensive and manual extraction of information from documents.

Enterprise document challenges

Document and domain diversity compounded by varied formats, layouts and real-world noise

Advent of semi-structured and unstructured data limiting the efficacy of traditional OCR tools

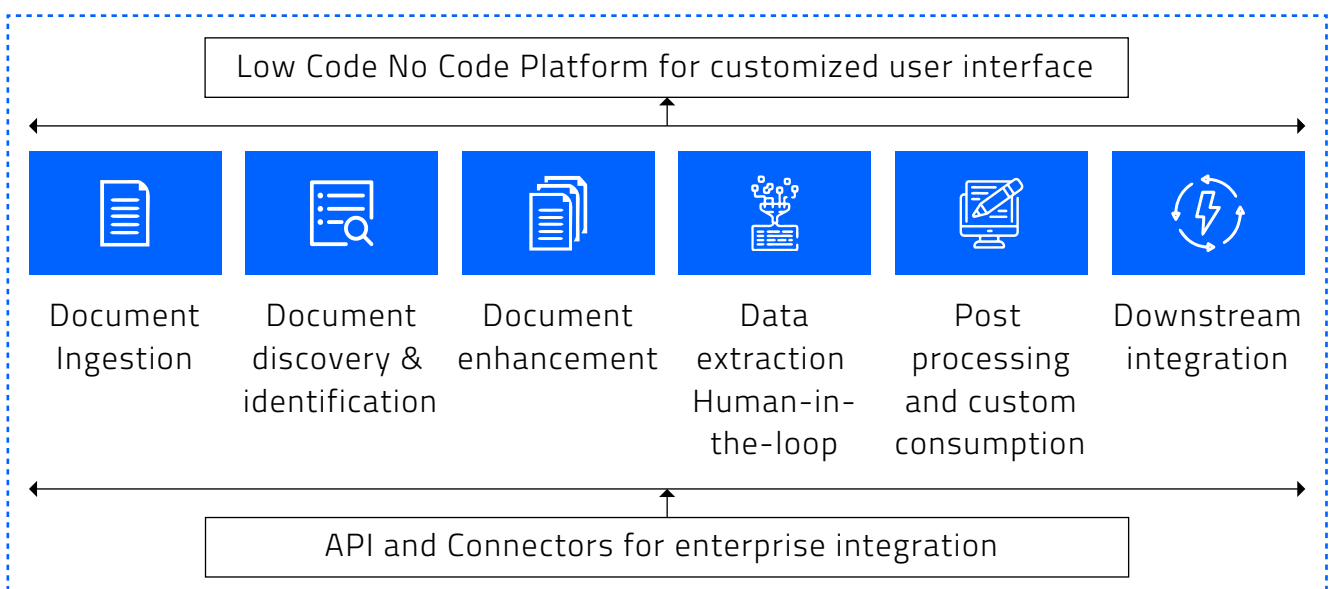

Lack of clean, consistent and usable data

Manual processing leading to inefficiency and delays in decision-making

Platform overview

XtractEdge platform optimizes the document extraction, processing and comprehension pipeline to help enterprises unlock business value faster.

Key capabilities

Superior AI-powered document processing

Technology Capabilities

- Automated document discovery with unsupervised learning capabilities
- Low Code capability to build custom apps on the platform
- Advanced vision and NLP technologies to extract content from complex documents
- Platform supports declarative non-AI based; standard, third party and custom AI driven models

Market leading functionality

- All extraction capabilities in one designer studio - NLP, computer vision based, 3rd party model.
- Faster onboarding of document types with bulk processing
- Persona based performance analytics dashboard for effective quality control
- Workflow orchestration component to create custom workflows and flexible post processing
- Superior HITL studio - with workflows, integrators, rules, e-mail etc.

Powerful User Interface

- Unified interface to design simple to complex document extractions
- Purpose built and role appropriate user interface
- Intuitive GUI workbench for guided manual review with feedback loop

Infrastructure and API capability

- Simplified and reduced deployment footprint to run the document operations
- Microservices based architecture with standard and compliant APIs
- Built-in connectors for integration with enterprise applications

Minimum disruption. Maximum extraction.

Enterprise ready platform

- Professional services enabled delivery, customization, integration & support
- Managed services for infrastructure set-up, deployment and product support
- Ease of use, enterprise scale and security

Why EdgeVerve

Right program design

- Highly consultative role to help clients to make the right choices
- Setting up Governance
- Security & Deployment strategies

Technology Capabilities

- Light Agile model towards rapid rollout
- Complete implementation service
- Joint implementations with client / vendor teams
- Client / partner led implementation

Bringing it all
together for
customer success

End-to-end partnership

- Process consulting and Business Case Creation
- Requirement gathering & PoC
- Infrastructure Design and setup
- Change Management
- CoE setup

Enablement, support and training

- Sandbox environment
- Experience Portal with multiple use cases
- Edgeverve Academy
- Team for 24X7 support
- Client dedicated teams

Who is building the future-ready enterprise with XtractEdge platform

Digitized & automated loan applications for an American bank

A leading US bank processed millions of KYC documents and reduced the turnaround time from weeks to days

- Implemented XtractEdge for bulk processing of historic and current load of KYC documents
- Capability to use same models for similar document types and extend existing models for new document types developed
- Currently implemented for 2 Lines of Business, XtractEdge will be extended further to more LOBs
- 40mn KYC documents across 60+ document types will be processed at speed in the next 12 months

One of the leading American telecoms identified hidden risks in its tower lease contracts

- XtractEdge automated the contract review process - identity, extract and manage data from over 700,000+ contracts
- Assessed risk and flagged high-risk contracts
- Saved \$21mn by actionizing the insights generated with a deeper understanding of hidden risks
- 60% improvement in productivity of contract negotiations team

A global insurance provider improves the submission to quote ratio by 5%

- XtractEdge Commercial Insurance extracted data from submission e-mails, attachments and all kinds of documents. Extracted information integrated and enriched with external third-party data sources
- Solution now being expanded to 83 products across 7 LOBs, as also the client's UK operations.
- Increased 'Quote-to-Bind' by over 15% due to request processing based on propensity to bind, 40% reduction in manual efforts in submission clearance

A Japanese conglomerate reduced contract review time from 150 minutes to 15 and costs from \$220 to under \$25

- XtractEdge Contract Analysis built contract summary, performed risk analysis more efficiently and offered alternate clauses or legal wordings at scale
- 9x improvement in procurement team productivity
- Processing capacity increased to 2.3 million contracts per year from a mere 260,000 contracts per year
